Subject Index

VOLUME 22, 2002

Absence seizures, classification protocols, 239–245
Acquired immunodeficiency syndrome (AIDS), infectious myelopathies, 133–140
Acute stroke, neurological management strategies, 53–60
Adaptation, postural sway measurements, 411–417
Adoption, postural sway measurements, 411–417
Alcohol consumption and abuse, absinthe use, neurotoxicology studies, 89–93
Alzheimer's disease
  clinical management of, 71–74
  dementia recognition and diagnosis, cost-effectiveness in, 63–69
Amyotrophic lateral sclerosis (ALS), diagnosis and management issues, 75–87
Angioplasty, stroke diagnosis and management and, 58–60
Angle closure glaucoma, anti-epileptic drug protocols, topiramate pharmacokinetics, 36–38
Anticardiolipin antibodies, neuromyelitis optica, diagnosis and management, 116–119
Anticoagulants, stroke management strategies, 56–60
Antidepressants, Alzheimer's disease management, 72–74
Antiepileptic drugs (AEDs)
  Alzheimer's disease management, 73–74
  elderly patients, management issues, 309–317
  epilepsy and sleep and, 321–326
  epilepsy management protocols using, 247–257
  pregnant epileptic women, maternal and fetal outcomes, 299–305
  research overview of, 233–234
  therapeutic strategies and issues, 27–38
  women patients, pharmacokinetics of, 290–294
Antiplatelet therapy, stroke management strategies, 56–60
Antipsychotics, Alzheimer's disease management, 73–74
Antivaccinia gamma-blobulin, postvaccinal encephalitis and smallpox vaccine, 95–97
Antiviral therapy
  amyotrophic lateral sclerosis (ALS), 81–87
  postvaccinal encephalitis and smallpox vaccine, 97
Aphasia, clinical examination, origins of, 335–347
Archicerebellum, clinical examination, historical development of, 375–383
Arthrodesis
  degenerative spondylolisthesis and, 193–194
  lumbar interbody fusion, indications, techniques, and complications, 221–229
  rheumatoid arthritis (RA), cervical spine, diagnosis and management, 179–185
Asymptomatic carotid stenosis, 59–60
Ataxia, cerebellar examination, historical development of, 375–383
Atlantoaxial arthrodesis, rheumatoid arthritis (RA), cervical spine, diagnosis and management, 181–185
Atonic seizures, classification protocols, 241–245

Babinski, Joseph, 391–398
Babinski sign, historical development of, 391–398
Benzodiazepine
  elderly patients, pharmacology in, 316–317
  epilepsy management, pharmacologic characteristics, 252–257
Bioterrorism, postvaccinal encephalitis and smallpox vaccine, 95–97
Blood cultures, stroke evaluation, cerebrospinal fluid (CSF) interpretation and, 14
Brain stimulation
  devices for, epilepsy management protocols using, 259–266
  epilepsy surgery, protocols for, 269–277
Breast-feeding, antiepileptic drugs, pharmacology of, 294
Broca, Paul, clinical aphasia examination and, 335–347
Brown-Séquard, Charles-Edouard, sensory examination, contributions to, 401–406

Carbamazepine
  elderly patients, pharmacology in, 314–317
  pharmacologic characteristics, 251–257
  therapeutic strategies and issues, anti-epileptic drugs, 27–38
Carotid endarterectomy (CEA), stroke diagnosis and management and, 58–60
Catamenial seizures, women patients, management in, 290–294
Cauda equina syndrome, lumbar spinal stenosis and, 161–164
Cerebellar examination, historical development of, 375–383
Cerebellar stimulator, epilepsy management using, 259–266
Cerebrospinal fluid (CSF)
  infectious disease diagnosis and interpretation of, 9–14
  neuromyelitis optica, diagnosis and management, 109–119
Cervical myelopathy, diagnosis and management, 143–147
Cervical spine, rheumatoid arthritis, diagnosis and management, 179–185
Cervical spondylotic myelopathy, diagnosis and management of, 143–147
Chaddock, Charles G., 391–398
Chaddock sign, historical development of, 391–398
Charcot, Jean-Martin, sensory examination, contributions to, 402–406

Copyright © 2002 by Thieme Medical Publishers, Inc., 333 Seventh Avenue, New York, NY 10001, USA. Tel: +1(212) 584-4662.

Chemically induced convulsions, antiepileptic drugs (AEDs), management protocols, 248–257
Chloinesterase inhibitors, Alzheimer's disease management, 71–74
Clonazepam, epilepsy management, pharmacologic characteristics, 252–257
Clonic seizures, classification protocols, 241–245
Cobb's syndrome. *See* Metameric angiomatosis
Cognitive dysfunction, anti-epileptic drug protocols, strategies and issues, 35–38
Collagen vascular disease, neuromyelitis optica, diagnosis and management, 116–119
Computed tomography (CT), epilepsy diagnosis and management, 279–285
Connective tissue diseases, neuromyelitis optica, diagnosis and management, 117–119
Cornea, clinical examination, historical development of, 358–364
Corpus callosotomy, epilepsy management with, 274–277
Cortical lesions, antiepileptic drugs (AEDs), management protocols, 248–257
Cost issues in neurology, dementia recognition and diagnosis, 63–69
Cranial nerves, description and numbering system, historical evolution of, 350–354
Cryptococcal meningitis, cerebrospinal fluid (CSF) interpretation, differential diagnosis, 9–14
Cyclooxengenase-2 inhibitor, ALS therapy, 81–87
Cytomegalovirus, infectious myelopathies, 133–140

Deep tendon reflexes, historical discovery of, 385–388
Dementia
  ALS, motor neuron disease, and related disorders, 80–87
  clinical management of, 71–74
  recognition and diagnosis, cost issues in, 63–69
Demyelinating disease
  "ABCNR" drug protocol, multiple sclerosis, 17–24
  neuromyelitis optica, diagnosis and management, 105–119
Dermatomyositis, diagnostic and therapeutic issues, 41–50
Devic's disease, neuromyelitis optica, diagnosis and management, 105–119
Diagnostic protocols
  ALS, motor neuron disease, and related disorders, 75–87
  dementia recognition and diagnosis, cost-effectiveness in, 63–69
  neuromyelitis optica, diagnosis and management, 107–119
Diazepam, epilepsy management, pharmacologic characteristics, 252–257
Disc degeneration, imaging techniques, 207–219
Discectomy, lumbar interbody fusion, indications, techniques, and complications, 221–229
Disconnection procedures, epilepsy management with, 274–277
Disseminated angiomatosis, surgical management, 129–130
DNA testing, ALS, motor neuron disease, and related disorders, 80–87
Dosing regimens, anti-epileptic drugs, epilepsy management, pharmacologic characteristics, 254–257
Dysdiodochokinesis, cerebellar examination, historical development of, 375–383
Dysnergia, cerebellar examination, historical development of, 375–383

Echocardiography, stroke diagnosis and management, 58–60
Economics in neurology, dementia recognition and diagnosis, cost-effectiveness in, 63–69
Elderly patients, epilepsy management in, 309–317
Electromyography, root and spinal disease, 197–202
Electrophysical evaluation, root and spinal disease, 197–202
Embolization, spinal arteriovenous malformations, surgical management, 123–130
Endocrinopathies, neuromyelitis optica, diagnosis and management, 115–119
Enteroviruses, infectious myelopathies and, 136–140
Epidural abscesses, infectious myelopathies and, 140
Epidural arteriovenous malformations, surgical management, 128–130
Epilepsy
  anti-epileptic drug protocols, strategies and issues, 27–38, 247–257
  classification protocols, 237–245
  elderly patients, management protocols, 309–317
  neuroimaging studies, 279–285
  pregnant women patients, maternal and fetal outcomes, 299–305
  research overview of, 233–234
  sleep disorders and, 321–326
  surgical management of, 269–277
  therapeutic devices, 259–266
  women patients, management protocols, 289–294
Erb, Wilhelm Heinrich, deep tendon reflexes, historical discovery of, 385–388
Erlanger, Joseph, sensory examination, contributions to, 402–406
Ethosuximide
  epilepsy management, pharmacologic characteristics, 251–257
  therapeutic strategies and issues, anti-epileptic drugs, 27–38
Evoked potentials, root and spinal disease, 197–202
Extensor plantar response, historical development of, 391–398

Facet joints. *See* Zygapophyseal joint
Felbamate
  elderly patients, pharmacology in, 315–317
  pharmacologic characteristics, 252–257
  therapeutic strategies and issues, anti-epileptic drugs, 27–38
Fetal outcomes, epileptic pregnant women, antiepileptic drugs and, 299–305
Flow models of aphasia, Lichtheim's and Wernicke's models, 340–347
Foerster, Otfrid, sensory examination, contributions to, 402–406
Freud, Sigmund, functional systems model of aphasia, 344–347
Functional magnetic resonance imaging (FMRI), epilepsy diagnosis and management, 284–285
Functional systems models of aphasia, Jackson's and Freud's models, 344–347
Fungal pathogens, infectious myelopathies and, 139–140

Gabapentin
elderly patients, pharmacology in, 315–317
pharmacologic characteristics, 252–257
therapeutic strategies and issues, anti-epileptic drugs, 27–38
Gadolinium imaging, herniated discs, 209–219
Gall, Franz Joseph, mental function research of, 336–347
Gamma knife radiosurgery, epilepsy management with, 276–277
Gasser, Herbert, sensory examination, contributions to, 402–406
Generalized seizures, classification protocols, 239–245
Glatiramer acetate, "ABCNR" drug protocol, multiple sclerosis, 20–24
Graft procedures, lumbar interbody fusion, indications, techniques, and complications, 227–229

Head, Henry (Sir), sensory examination, contributions to, 402–406
Hemispherectomy/hemispheric disconnection, epilepsy management with, 275–277
Hepatic failure, anti-epileptic drug protocols, strategies and issues, 33–38
Herniated discs, imaging techniques, 209–219
Hinsdale, Guy, 414–417
History of medicine
absinthe use, neurotoxicology studies, 89–93
neurological examination techniques
background, 331
cerebellar examination, historical development of, 375–383
clinical aphasia examination, 335–347
deep tendon reflexes, discovery of, 385–388
extensor plantar response, Babinski and CHaddock signs, 391–398
motor cranial nerves, history of clinical examination, 349–354
motor testing, historical overview, 367–373
Romberg sign and postural sway measurements, 409–417
sensory examination, origins of, 399–406
visual examination, historical roots, 357–364
postvaccinal encephalitis and smallpox vaccine, 95–97
Human immunodeficiency virus (HIV), infectious myelopathies, 133–140
Human T-cell lymphotropic virus type I (HTLV-I), infectious myelopathies, 133–140
Hyponatremia, anti-epileptic drug protocols, strategies and issues, 30–38
Hypotonia, cerebellar examination, historical development of, 375–383

Idiopathic (primary) epilepsy, classification protocols, 243–245
Imaging techniques
epilepsy neuroimaging, 279–285
spinal arteriovenous malformations, 124–130
spinal disorders, 205–219
Immunotherapy
"ABCNR" drug protocol, multiple sclerosis, 17–24
inflammatory myopathies, diagnostic and therapeutic issues, 41–50
Inclusion body myositis, diagnostic and therapeutic issues, 41–50
Indigenous Americans, neuromyelitis optica, diagnosis and management, 115–119
Infectious disease
differential diagnostic techniques, 9–14
myelopathies, 133–140
neuromyelitis optica, diagnosis and management, 117–119
spinal disorders, imaging techniques, 214–219
Interferon-beta drugs, "ABCNR" drug protocol, multiple sclerosis, 19–24
Interictal epileptiform activity, sleep and, 322–326

Jackson, Hughlings, clinical aphasia examination and, 335–347
Juvenile myoclonic epilepsy (JME), sleep and, 323–326

Kennedy's disease, diagnosis and management issues, 75–87
Kindling seizures, antiepileptic drugs (AEDs), management protocols, 248–257

Labor and delivery outcomes, epileptic pregnant women, antiepileptic drugs and, 303–305
Lamotrigine
elderly patients, pharmacology in, 315–317
pharmacologic characteristics, 253–257
therapeutic strategies and issues, anti-epileptic drugs, 27–38
Landau-Kleffner syndrome (LKS), sleep and, 323–326
Language dysfunction, clinical aphasia examination, origins of, 335–347
Late responses, root and spinal disease, electrophysical evaluation, 197–202
Lead poisoning, diagnosis and management of, 77–87
Lennox-Gastaut syndrome, classification protocols, 244–245
Levetiracetam
elderly patients, pharmacology in, 316–317
epilepsy management, pharmacologic characteristics, 253–257
therapeutic strategies and issues, anti-epileptic drugs, 27–38
Lichtheim, Ludwig, aphasia flow models, 340–347
Localization-related epilepsy syndromes, classification protocols, 241–245
Locomotor ataxia. *See* Tabes dorsalis
Lorazepam, epilepsy management, pharmacologic characteristics, 252–257
Lumbar instability, zygapophyseal joint and, 187–194
Lumbar interbody fusion, indications, techniques, and complications, 221–229
Lumbar puncture, stroke evaluation, cerebrospinal fluid (CSF) interpretation and, 14
Lumbar spinal stenosis, diagnosis and management, 157–164
Lumbar zygapophyseal joint, spinal pain syndromes and degenerative spondylolisthesis, 187–194

Magnetic resonance imaging (MRI)
epilepsy diagnosis and management, 279–285
spinal arteriovenous malformations, 124–130
spinal imaging, 205–219

Magnetic resonance relaxometry (MRR), epilepsy diagnosis and management, 284–285
Magnetoencephalography (MEG), epilepsy diagnosis and management, 284–285
Maximal electroshock seizure (MES) test, antiepileptic drugs (AEDs), epilepsy management protocols using, 247–257
Metameric angiomatosis, surgical management, 129–130
Mitchell, Silas Weir, 413–417
Mitoxantrone, "ABCNR" drug protocol, multiple sclerosis, 20–24
Motor cranial nerves, history of clinical examination of, 349–354
Motor neuron disease, diagnosis and management issues, 75–87
Motor testing protocols, historical development of, 367–373
Multifocal motor neuropathy (MMN), diagnosis and management issues, 75–87
Multifocal white matter disease, electrophysical evaluation, 202
Multiple sclerosis (MS)
  "ABCNR" drug protocol, 17–24
  imaging techniques, 210–219
  neuromyelitis optica diagnosis and management and, 105–119
Multiple subpial transections, epilepsy management with, 275–277
Muscular innervation, motor cranial nerves, 351–354
Myelitis
  cerebrospinal fluid (CSF) interpretation, differential diagnosis, 9–14
  neuromyelitis optica, diagnosis and management, 105–119
Myelography, spinal disorders, 206–219
Myelopathies
  cervical myelopathy, diagnosis and management, 143–147
  electrophysical evaluation, 197–202
  imaging techniques, 210–219
  infectious myelopathies, 133–140
  vascular myelopathies, 123–130
Myoclonic seizures, classification protocols, 241–245
Myopathies, inflammatory myopathies, diagnostic and therapeutic issues, 41–50

Neocerebellum, cerebellar examination, historical development of, 375–383
Neocortical resection, epilepsy management with, 269–277
Neoplasms, spinal disorders, imaging techniques, 216–219
Nerve stimulation devices, epilepsy management, 259–266
Neurogenic claudication, lumbar spinal stenosis and, 157–164
Neuroimaging techniques, epilepsy diagnosis and management, 279–285
Neurological examination techniques
  background, 331
  cerebellar examination, historical development of, 375–383
  clinical aphasia examination, 335–347
  deep tendon reflexes, discovery of, 385–388
  extensor plantar response, Babinski and Chaddock signs, 391–398
  motor cranial nerves, history of clinical examination, 349–354
  motor testing, historical overview, 367–373
  Romberg sign and postural sway measurements, 409–417
  sensory examination, origins of, 399–406
  visual examination, historical roots, 357–364
Neuromuscular scoliosis, diagnosis and management of, 167–176
Neuromyelitis optica (NMO), diagnosis and management, 105–119
Neurotoxicology, absinthe use and, 89–93
Nonpharmacologic treatments, Alzheimer's disease management, 73–74
Nystagmus, cerebellar examination, historical development of, 375–383

Obesity, anti-epileptic drug protocols, strategies and issues, 28–38
Occipitocervical arthrodesis, rheumatoid arthritis (RA), cervical spine, diagnosis and management, 181–185
Odontoid resection, rheumatoid arthritis (RA), cervical spine, diagnosis and management, 183–185
Ophthalmoscopy, historical development of, 357–364
Optic neuritis, neuromyelitis optica, diagnosis and management, 105–119
Opticospinal multiple sclerosis, neuromyelitis optica, diagnosis and management, 109–119
Osler-Weber-Rendu syndrome. *See* Disseminated angiomatosis
Ossification of posterior longitudinal ligament (OPLL), cervical myelopathy and, 143–147
Osteoporosis
  epileptic women patients, management issues for, 291–294
  vertebral compression fracture, percutaneous vertebroplasty for, 149–154
Oxcarbazepine
  elderly patients, pharmacology in, 316–317
  epilepsy management, pharmacologic characteristics, 253–257
  therapeutic strategies and issues, anti-epileptic drugs, 27–38

Pain/tactile sensation, sensory examination, contributions to, 403–406
Paleocerebellum, cerebellar examination, historical development of, 375–383
Parainfectious myelitis, diagnosis of, 137–140
Parasitic pathogens, infectious myelopathies and, 139–140
Paravertebral vascular malformations, surgical management, 123–130
Partial seizures, classification protocols, 238–245
Patent foramen ovale (PFO), Warfarin *vs.* Aspirin in Recurrent Stroke Study (WARSS), 58–60
Percussion hammer, deep tendon reflexes, historical discovery of, 385–388
Percutaneous vertebroplasty, vertebral compression fracture, management with, 149–154
Perinuclear antineutrophil cytoplasmic antibodies (p-ANCA), neuromyelitis optica, diagnosis and management, 116–119
Pharmacoeconomics, dementia recognition and diagnosis, cost-effectiveness in, 63–69

Pharmacokinetics
"ABCNR" drug protocol, multiple sclerosis, 17–24
absinthe use, neurotoxicology studies, 89–93
antiepileptic drugs (AEDs)
elderly patients, 309–317
management protocols, 247–257
therapeutic strategies and issues, 27–38
Phenobarbital
elderly patients, pharmacology in, 314–317
pharmacologic characteristics, 251–257
therapeutic strategies and issues, anti-epileptic drugs, 27–38
Phenytoin
elderly patients, pharmacology in, 312–317
pharmacologic characteristics, 250–257
therapeutic strategies and issues, anti-epileptic drugs, 27–38
Pin prick test, sensory examination, historical origins of, 399–406
Platelet inhibitors, stroke management strategies, 56–60
Polymyositis, diagnostic and therapeutic issues, 41–50
Polypharmacy, anti-epileptic drug protocols, strategies and issues, 33–38
Polysomnography, epilepsy and sleep and, 321–326
Positron emission tomography (PET), epilepsy diagnosis and management, 279–285
Posterior longitudinal ligament, ossification, with cervical myelopathy, 143–147
Postpartum care, epileptic pregnant women, antiepileptic drugs and, 304–305
Postural sway, Romberg sign and, 409–417
Posturography, postural sway measurements, 409–417
Postvaccinal encephalitis, smallpox vaccine and, 95–97
Pregnancy
antiepileptic drugs, pharmacology of, 293–294
epileptic women, maternal and fetal outcomes, 299–305
Prenatal screening, epileptic pregnant women, antiepileptic drugs and, 303–305
Primary lateral sclerosis (PLS), diagnosis and management issues, 79–87
Primidone, therapeutic strategies and issues, anti-epileptic drugs, 27–38
"Procedure visit" concept, dementia recognition and diagnosis, cost-effectiveness in, 66–69
Proprioception
postural sway measurements, 409–417
sensory examination, historical origins of, 399–406
Pupils, clinical examination, historical development of, 358–364

Radiculopathy
electrophysical evaluation, 197–202
lumbar spinal stenosis and, 157–164
Radiographic imaging, spinal disorders, 206–219
Radiosurgery, epilepsy surgery, protocols for, 269–277
Rapid alternating movements, cerebellar examination, historical development of, 375–383
Rapid-plasma-reagin test, cerebrospinal fluid (CSF) interpretation, differential diagnosis, 12–14
Rashes
anti-epileptic drug protocols, strategies and issues, 30–38
cerebrospinal fluid (CSF) interpretation, differential diagnosis, 11–14
Rebound phenomenon, cerebellar examination, historical development of, 375–383
Rectal valium gel, epilepsy management, pharmacologic characteristics, 252–257
Refractory seizures, nerve stimulation devices and, 259–266
REM sleep, epilepsy and, 321–326
Renal failure, anti-epileptic drug protocols, strategies and issues, 33–38
Reproductive hormones, epileptic women patients, management issues for, 292–294
Rheumatoid arthritis (RA), cervical spine, diagnosis and management, 179–185
Risk factors, neurological management of stroke risk, 58–60
Romberg, Moritz von
postural sway measurements, 409–417
sensory examination, contributions to, 401–406
Romberg sign, historical evolution of, 409–417
Root disease, electrophysical evaluation, 197–202

Schistosomiasis, infectious myelopathies, 133–140
Scoliosis, neuromuscular scoliosis, diagnosis and management of, 167–176
Secondary stroke, neurological management strategies, 53–60
Seizure disorders
antiepileptic drugs (AEDs), management protocols, 248–257
classification protocols, 237–245
nerve stimulation devices for, 259–266
pregnant women, management issues, 300–305
sleep and, 323–326
women patients, management in, 290–294
Sensory examination, historical origins of, 399–406
Sensory-induced seizures, antiepileptic drugs (AEDs), management protocols, 248–257
Sequential drug protocols, "ABCNR" drug protocol, multiple sclerosis, 17–24
Sherrington, Charles, sensory examination, contributions to, 402–406
Single photon emission computed tomography (SPECT), epilepsy diagnosis and management, 279–285
Sjögren syndrome, neuromyelitis optica, diagnosis and management, 116–119
Sleep disorders, epilepsy and, 321–326
Smallpox vaccine, postvaccinal encephalitis and, 95–97
Spinal angiography, spinal arteriovenous malformations, surgical management, 123–130
Spinal canal, lumbar spinal stenosis and, 157–164
Spinal cord
arteriovenous malformations, surgical management, 123–130
electrophysical evaluation, clinical diseases, 197–202
Spinal disorders
cervical myelopathy, 143–146
imaging techniques, 205–219
infectious myelopathies, 133–140
lumbar interbody fusion, 221–229
lumbar spinal stenosis, 157–164

Spinal disorders *(cont.)*
lumbar zygapophyseal joints and, 187–194
neuromuscular scoliosis, 167–176
neuromyelitis optica, 105–119
research overview, 101
rheumatoid arthritis, cervical spine, 179–185
root and spinal cord disease, 197–202
vascular myelopathies, 123–130
vertebral compression fractures, percutaneous vertebroplasty, 149–154
Spinal dural arteriovenous fistulas, surgical management, 123–130
Spinal hemangiomas, surgical management, 129–130
Spinal stenosis
imaging techniques, 206–219
lumbar spinal stenosis, 157–164
Spinomuscular atrophy (SMA), diagnosis and management issues, 80–87
Spondylolisthesis, zygapophyseal joint and, 187–194
Spondylosis, lumbar spinal stenosis and, 157–164
Steroid hormones, women patients, epilepsy management in, 289–294
Stroke. *See also* Acute stroke; Secondary stroke
cerebrospinal fluid (CSF) interpretation, differential diagnosis, 9–14
neurological management strategies, 53–60
Subaxial arthrodesis, rheumatoid arthritis (RA), cervical spine, diagnosis and management, 182–185
Sway meter, postural sway measurements, 413–417
Syphilis
cerebrospinal fluid (CSF) interpretation, differential diagnosis, 9–14
infectious myelopathies, 133–140
Systemic diseases, neuromyelitis optica, diagnosis and management, 116–119
Systemic lupus eruthematosis (SLE), neuromyelitis optica, diagnosis and management, 116–119

Tabes dorsalis
infectious myelopathies, 133–140
postural sway measurements, 409–417
Temperature sensitivity, sensory examination, historical origins of, 404–406
Temporal lobe resection, epilepsy management with, 269–277
Teratogenecity
anti-epileptic drugs (AEDs), pharmacologic characteristics, 256–257
antiepileptic drugs (AEDs), pregnant epileptic women, maternal and fetal outcomes, 299–305
Thalamic stimulator, epilepsy management using, 259–266
Therapeutic strategies
"ABCNR" drug protocols for multiple sclerosis, 17–24
ALS, motor neuron disease, and related disorders, 75–87
Alzheimer's disease management, 71–74
antiepileptic drugs (AEDs)
management protocols using, 247–257
pharmacokinetics, 27–38
clinical review, 5–6
treatment devices, epilepsy management, 259–266
vertebral compression fractures, percutaneous vertebroplasty for, 149–154
Thoracolumbosacrral orthosis (TLSO), neuromuscular scoliosis, diagnosis and management of, 171–176
Thrombolytic therapy, stroke management strategies, 53–60
Thujone compounds, absinthe use, neurotoxicology studies, 89–93
Tiagabine
elderly patients, pharmacology in, 315–317
epilepsy management, pharmacologic characteristics, 254–257
therapeutic strategies and issues, anti-epileptic drugs, 27–38
Tonic-clonic seizures, classification protocols, 239–245
Tonic seizures, classification protocols, 241–245
Topiramate
elderly patients, pharmacology in, 316–317
epilepsy management, pharmacologic characteristics, 254–257
therapeutic strategies and issues, anti-epileptic drugs, 27–38
Toxicity studies
absinthe use, 89–93
antiepileptic drugs (AEDs), therapeutic strategies and issues, 27–38
Transverse myelitis, cerebrospinal fluid (CSF) interpretation, differential diagnosis, 13–14
Trauma, spinal injury, imaging techniques, 218–219
Tropical diseases, neuromyelitis optica, diagnosis and management, 114–119
Tuberculosis, infectious myelopathies, 133–140
Tuning fork, sensory examination, historical origins of, 399–406
Two-point discrimination, sensory examination, historical origins of, 399–406

Upper motor neurons, motor testing protocols, historical development of, 367–373

Vaccines, postvaccinal encephalitis, 95–97
Vacuolar myelopathy, diagnosis and management, 133–140
Vagus nerve stimulator, epilepsy management using, 259–266
Valproate
epilepsy management, pharmacologic characteristics, 251–257
therapeutic strategies and issues, anti-epileptic drugs, 27–38
Valproic acid, elderly patients, pharmacology in, 314–317
Varicella-zoster virus, infectious myelopathies, 133–140
Vascular myelopathies, surgical management of, 123–130
Vertebral compression fractures, percutaneous vertebroplasty for, 149–154
Vibratory sensation, sensory examination, historical origins of, 405–406
Viral hypothesis, amyotrophic lateral sclerosis (ALS), 81–87
Visual acuity testing, historical development of, 357–364
Visual examination, historical development of, 357–364
Visual integration disorders, clinical examination, historical development of, 363–364
Vitamin E, Alzheimer's disease management, 73–74
Von Frey, Max, sensory examination, contributions to, 403–406

Wernicke, Carl, clinical aphasia examination and, 335–347
Westphal, Carl Friedrich Otto, deep tendon reflexes, historical discovery of, 385–388
Women patients
  epilepsy management in, 289–294
  pregnant epileptic women, maternal and fetal outcomes, 299–305
Zonisamide
  epilepsy management, pharmacologic characteristics, 254–257
  therapeutic strategies and issues, anti-epileptic drugs, 27–38
Zygapophyseal joint, spinal pain syndromes and degenerative spondylolisthesis, 187–194
